R.E.A. 1587560
Cap. Soc. € 14.000.000,00 i.v.

Experience in DevOps, including CI/CD pipeline and continuous deployment.
Deep Knowledge on topics related to Cyber Security for Enterprise solutions.
The ideal candidate will have a proven track record of designing and implementing scalable, flexible, and secure solutions to design and support complex solutions.
Knowledge of the tool to document the solution design (Solution Outline, Architectural Diagrams, Confluence pages for technical design details)

Furthermore, he/she has the responsibilities below:

- Work closely with internal teams, clients, and third-party vendors to gather requirements, define solution architecture, and guide implementation efforts.
- Drive project delivery in an Agile environment, using tools such as Jira and Confluence to manage workflows and ensure alignment with business objectives.
- Ensure that all systems and integrations are optimized for performance and can scale to meet future business needs
